

April 2022 GLT Session Resources

[Recording of the session](#)

Resources from *The New York Times*:

- The New York Times Opinion Desk has a powerful interactive piece on climate change titled [Postcards from a World on Fire](#). This piece highlights how climate change is impacting all countries around the world.
- [We're Cooked](#) opinion video series
- [What do the Protectors of Congo's Peatland get in Return?](#)
- [The Unseen Toll of a Warming World](#)
- [A 'Silent Victim': How Nature Becomes a Casualty of War](#)

Resources from *World101 from the Council on Foreign Relations*:

- [What Is Climate Change?](#): This video lesson discusses what climate change is, why the climate is changing, what it means for us, and what we can do about it.
- [Why Scientists Are Watching Greenland](#)
- [Who is Responsible for Climate Change?](#): This video lesson discusses the responsibility of developed and developing nations in causing climate change.
- [The Paris Agreement](#): This lesson defines the Paris Agreement and discusses its challenges and limitations, as well as the future of it.
- [Climate Change Inequality](#): This lesson explores how rising temperatures disproportionately affect certain communities.
- [The Greenhouse Effect](#): This lesson discusses the role that greenhouse gases play in climate change and why this is concerning.
- [Climate Change and the Coffee Industry](#): This video lesson explores the impacts of climate change on the coffee industry, demonstrating how climate change is both an environmental and economic problem.
- [What Is Water Scarcity?](#): This lesson explores the origins of water scarcity, the stakes of the problem, and possible solutions.
- [Sources of Energy: A Comparison](#): This lesson compares the benefits and drawbacks of the different types of energy available in different countries.
- [Who Releases the Most Greenhouse Gases?](#): This lesson examines the countries, companies, and industries emitting the most greenhouse gases and contributing to climate change.
- [How Do Governments Combat Climate Change?](#): This lesson outlines seven policies aimed at combating climate change and explores their potential upsides and downsides for society.
- [Climate Change Adaptations](#): This lesson explores how different countries use methods of mitigation, adaptation, or both to combat the various effects of climate change.
